How to use www.run.KeyTrain.com at school and/or at home.

Directions: Just read one step at a time and do it. It’s that easy!

Note: While in the computer lab, do not go to any other websites or use any other computer programs. Also there is to be no music or video streaming of any kind!!!

1. Start Internet Explorer or any other web browser and type www.run.keytrain.com into the web page address bar and press enter. Note: Since this is a web based program you may work on it from any computer connected to the internet, even a computer at your home.

Username Instructions:
2. Type in username.

Password Instructions
3. Type in password.

4. When the new page opens click on “My Assignments”

5. Next click on “Applied Math”.

6. Find the Level that indicates that you have “Not Attempted” it yet and begin by clicking on the start button. All students need to pass Levels 1 through 4 at a minimum. If a Level is not listed, then you have already passed it!

Skip these topics if you want to.

7. Study, practice, and work carefully. Complete each practice topics before you attempt to take the Final Quiz at the bottom.

You will only be allowed two attempts to pass the quiz for each level. Ask questions if you need help. If you need to make a third attempt, please see a KeyTrain instructor.

8. Note that there is an online calculator that you can use and if the problem requires a formula or conversion factor, there will be a phase below the problem that you can click on for the information.
